## THEMATIC AREA OF ACTIVITY

### Sector:

- Military
- Police
- Civil protection

### Thematic area:

- Product and technology integration
- Communication

### Level:

- Single Product/ Mass market
- Integrated platforms
- Subsystems or equipment
- Components
- Services
- Solutions

### Specialization:

- Tactical UHF/L-band Radio Terminals
- SATCOM Terminals
- Equipment and Accessories for Radio Terminals (headsets, controllers, intercom systems)

## PROFILE

Micro-Link Ltd is ICT company with almost 30 years of experience in the field of radiocommunications and telecommunications.

We are specialized for engineering, project design and integration of complex wireless communications solutions. As a system integrator, our aim is to offer top quality equipment to our customers, so we are valuable partner of world leading manufacturers of ICT solutions.

In public safety area, we can offer tactical radio systems and SATCOM solutions, along with appropriate audio accessories, manufactured by world-leading companies: TDSI, Motorola Solutions and INVISIO. TDSI's multi-band radio systems are world's smallest and lightest such solutions currently available. There are Type1 and Clear versions. TDSI can also offer extremely small single-band tactical radio systems specially developed for narrowband or wideband communication. All TDSI radios are characterized by MANET technology as an important characteristic of modern military communication systems. Tactical SATCOM solutions provide critical mobile satellite communication specially developed for aircraft, maritime and land vehicle.

Additionally, there are also soldiers' satellite terminals with terminal antennas diameter ranging from 60cm to 130 cm. Motorola's mission critical radios are rugged and lightweight yet fully capable TETRA portable radio that are easy to carry and easy to use. With the option to ramp up to Class 3 (2.8W) transmission power and high receiver sensitivity, you can rely on the Motorola radios to keep you connected.

With INVISIO advance hearing protection system clear communication is guaranteed, even in most demanding environments. Bone conduction technology enables clear communication in extreme conditions, even when whispering.

## ACTIVITIES AND PRODUCTS:

- Critical communication systems including, but not limited to:
  - Military:
    - VHF/UHF/L-band tactical handheld radio:
      - Thales Defense and Security Inc.  
Models: TH5320/5325 dual channel, Javelin WB radio, Spear NB radio Vehicle Adapter / Amplifier for mobile version
    - SATCOM terminals:
      - Thales Defense and Security Inc.  
Models: MissionLink (land), VesseLink (navy)
      - Tampa Microwave: Tactical SATCOM terminals
  - Police handheld radio:
    - UHF/TETRA:
      - Motorola Solutions: Models: MTP3000, MTP6000, MXP600, LEX L11
  - Audio accessories including, but not limited to:
    - Headsets:
      - Invisio: Models: X5 (in-ear), M3s (in-ear), T5 (over-the-ear), T7 (over-the-ear)
    - Control Units:
      - Invisio: Models: V10 (single com), V20 (single-com), V50 (dual-com), V60 (tri-com)
    - Wireless Remote PTT:
      - Invisio: Models: M80, R30
    - Intercom System
    - IntelliCable
